REMEMBER

"I will praise you because I have been remarkably and wondrously made."—Psalm 139:14

THINK

1. Counting is fun! Which number is your favorite? Why do you think God created numbers?
2. Can you count all your toes? What about all your noses? How high can you count?
3. God made your body to be amazing! Each part has an important job. What would it be like if your arms and legs switched jobs? What about your eyes and ears?
4. Try to count how many parts of your body you've used today, from your arms and legs to your brain and heart. Are you thankful for all the things those parts can do?
5. Say a prayer and thank God for the wonderful body He gave you.
